

NEUROCA PROPRIETARY DUAL LICENSE PACKAGE (ACADEMIC + COMMERCIAL) v2.1

This License Package is made as of [●] (the "**Effective Date**") by and between Justin K. Lietz, an individual, and Neuroca, Inc., a [●] corporation (together, "**Licensor**"). This License Package governs access to and use of the project titled "**Prometheus_VDM**" (also referred to as "**VDM**") hosted at https://github.com/justinlietz93/Prometheus_VDM (the "**Repository**"), including all source code, data, designs, documentation, and other materials contained in or distributed from the Repository (collectively, the "**Materials**").

Intent and Scope. Licensor wishes to promote open academic research and personal, non-commercial use of the Materials while requiring a separate commercial license for any monetized or for-profit use, and to protect Licensor's proprietary inventions and pending patents. This License Package sets forth a dual-licensing model consisting of an Academic License for non-commercial use (which includes personal use) and a Commercial License available by separate written agreement. This License Package applies worldwide unless a different governing law or jurisdiction is specified herein.

Acceptance. By accessing, downloading, or using the Repository or any Materials, you acknowledge that you have read, understood, and agree to be bound by the Academic License terms contained herein solely for Academic Use and Personal Use, as defined. Commercial Use is strictly prohibited without a separate, duly executed commercial license agreement with Licensor. If you do not agree to the Academic License terms, do not access or use the Materials. NOW, THEREFORE, in consideration of the mutual covenants herein contained, the parties agree as follows:

1. License.md – Neuroca Proprietary Dual License (Academic + Commercial) v2.1

Title: Neuroca Proprietary Dual License (Academic + Commercial).

Version: 2.1; Last updated: November 11, 2025.

Copyright Notice: Copyright © 2025 Justin K. Lietz & Neuroca, Inc. All Rights Reserved.

Contact: justin@neuroca.ai.

a. Overview

b. Dual-License Model. The Materials are offered under a dual-license model:

c. Academic License (non-commercial), which also permits Personal Use as defined herein.

d. Commercial License, required for any Commercial Use, including any monetized, for-profit, or proprietary-integrating use.

e. Summary of Permitted Academic/Personal Uses. Subject to the conditions and restrictions herein, you may use, reproduce, and create Academic Derivative Works (as defined) of the Materials solely for Academic Use and Personal Use. Academic Use allows open research,

teaching, coursework, theses/dissertations, non-commercial open research, reproducibility and benchmarking activities, and publication. Personal Use allows individual, non-commercial use on systems personally controlled by the user, with no fees or monetization.

f. **Summary of Uses Requiring a Commercial License.** Any Commercial Use requires a separate, signed commercial license from Licensor. Commercial Use includes products or services, fee-based activities, internal corporate R&D leading to proprietary outcomes or patents, hosted or SaaS offerings, consulting or training for a fee, technology transfer, sublicensing, or monetization of outputs derived from the Materials.

g. **Third-Party Licenses.** Third-party components obtained via package managers remain under their respective licenses. This file explains how third-party licenses interact with this dual license and outlines notice and compliance obligations.

h. **Inquiries.** For commercial licensing, see `COMMERCIAL_LICENSE_REQUEST.md` and contact justin@neuroca.ai. For academic clarifications or written confirmation of non-commercial uses, see `ACADEMIC_LICENSE_REQUEST.md` and contact justin@neuroca.ai.

i. **Definitions**

j. **"Academic Use"** means use by individuals or institutions for research, education, teaching, coursework, theses/dissertations, non-commercial open research, reproducibility and benchmarking, and publication of results. Academic Use includes research funded by commercial entities only if the results and any derivative works are published openly and are not made proprietary, and if such use does not involve monetization or confer a commercial advantage to the funder beyond access to openly published results.

k. **"Personal Use"** means individual, non-commercial use by a natural person on systems personally controlled by that person, without any revenue generation, fees, or monetization of outputs, services, or derivative works, and without performance for or within a for-profit entity.

l. **"Commercial Use"** means any use that involves revenue, fees, or commercial advantage; any use performed for or within a for-profit entity or under a non-academic government contract; any fee-based consulting, training, managed services, or similar activities; any technology transfer, sublicensing, or licensing program; any integration of the Materials or derivatives into products or services; any internal corporate R&D that leads to proprietary outcomes or patents; any SaaS, hosted, or cloud service that exposes, embeds, integrates, or derives functionality from the Materials; or any monetization of outputs, models, or derivative works based on the Materials.

m. **"Derivative Work"** means any work based on, adapted from, incorporating, or modified from the Repository or the Materials, including but not limited to code, data, designs, equations, parameterizations, tools, models, experiments, documentation, or combinations thereof.

n. **"Reference-Based Use"** means a re-implementation or work substantially guided by methods, equations, parameter values, architectural choices, experimental procedures, training regimes, or analysis techniques disclosed in the Repository or Materials. Reference-Based Use expressly excludes purely independent implementations developed without material reliance on the Repository or Materials.

o. **"Outputs"** means any results, models, artifacts, visualizations, datasets, logs, analyses, publications, or other content generated using or derived from the Materials, including those produced by Academic Derivative Works or Reference-Based Use.

p. **"Repository"** means the GitHub repository at https://github.com/justinlietz93/Prometheus_VDM and any official branches or releases thereof, as maintained by Licensor.

q. **"Academic Derivative Works"** means Derivative Works created and used solely for Academic Use or Personal Use in compliance with this Academic License.

r. **"Licensee"** or **"you"** means the individual or entity exercising rights under this License Package.

s. Academic License (non-commercial; includes personal use)

t. Grant of Rights. Subject to the terms and conditions herein, Licensor grants to you a non-exclusive, worldwide, non-transferable, non-sublicensable, royalty-free license to use, reproduce, and create Academic Derivative Works of the Materials solely for Academic Use and Personal Use.

u. Permitted Uses (illustrative). The following are illustrative permissible Academic/Personal uses:

v. Academic research, teaching, coursework, and theses/dissertations.

w. Non-commercial open research, reproducibility, and benchmarking activities.

x. Personal non-commercial exploration and learning by individuals.

y. Sponsored research by commercial entities only if outcomes remain non-proprietary and are published openly under these Academic terms, with no monetization or commercial advantage beyond access to openly published results.

z. Attribution. You must provide credit to Licensor in any Academic Use, Personal Use, publication, release of Academic Derivative Works, or Reference-Based Use. Include the following citation:

{. Share-Alike for Academic Derivative Works. Academic Derivative Works must be distributed, if distributed, under terms no less protective and no more permissive than this Academic

License, including the non-commercial restriction and the attribution requirement, or under substantially similar non-commercial, attribution-required terms. This share-alike requirement does not grant any rights to use the Materials for Commercial Use.

|. Outputs Under Academic/Personal Use. Outputs generated under Academic Use or Personal Use may be used and shared non-commercially, provided that attribution is included as set forth in Section 2.3 and no monetization occurs.

} . Prohibited Uses Under Academic/Personal Use. The following are prohibited:

~. Any Commercial Use as defined in Section 1.3.

. Paid consulting, fee-based training, managed services, or similar activities.

. Technology transfer, sublicensing, or licensing to commercial entities.

. Ethical Restrictions. All Academic/Personal use must comply with the following:

, . No use for weapons development, mass surveillance, or applications intended for harm, exploitation, or unlawful discrimination.

f. Work on AI safety, interpretability, and alignment is encouraged.

„. Compliance Tips. Internal corporate R&D is deemed Commercial Use unless all resulting outputs, derivatives, and methods are published openly and non-proprietary under these Academic terms without monetization and without conferring a commercial advantage.

... Commercial License

†. Commercial Scope (non-exhaustive examples). Commercial Use includes:

‡. Integration into any product or service (software or hardware), including SaaS or hosted functionality.

^ . Fee-based consulting, training, managed services, or platform access.

% . Internal corporate or non-academic government R&D leading to proprietary outcomes or patents.

§. Monetization of Outputs, models, or derivative works derived from the Materials.

< . Technology transfer, sublicensing, IP packaging, or licensing programs.

Ⓔ. Prohibition Without License. No Commercial Use is permitted without prior written permission under a separate, signed commercial license agreement with Licensor.

. Request Process. To request a commercial license, complete `COMMERCIAL_LICENSE_REQUEST.md` and email justin@neuroca.ai.

. Note. Commercial license terms, negotiated separately, may address rights to monetize outputs, redistribution, embedding, cloud/SaaS rights, user or seat limits, support/updates, audit rights, termination, and patent license terms.

. Patent Notice and Proprietary Inventions

. Proprietary Inventions and Patents Pending. The Materials may disclose or embody proprietary inventions and patent-pending technologies, including:

‘. RE-VGSP — Resonance-Enhanced Valence-Gated Synaptic Plasticity.

’. SIE — Self-Improvement Engine.

“. EHTP — Emergent Hierarchical Topology Probe.

”. GDSP — Goal-Directed Structural Plasticity.

. Multi-Phase Training Strategies — Curriculum/homeostatic stimuli modulation.

- . Hierarchical TDA Analysis — Real-time knowledge-graph diagnostics.

— . Self-Modulating Neuron Models — Adaptive intrinsic plasticity.

~. Proprietary Equations and Parameterizations.

™. Patent Licensing Position. The Academic License grants rights to use the provided artifacts for Academic Use only. No patent license for Commercial Use or commercial exploitation is granted under the Academic License. Any Commercial Use of methods covered by Licensor's patents or patent applications requires a separate commercial license expressly granting applicable patent rights.

§. Defensive Termination. If you or your affiliate assert a patent claim in any forum alleging that the Materials, Licensor contributions, or implementations infringe any patent, then all rights granted to you under this License Package automatically terminate as of the date such claim is filed.

›. Third-Party Licenses and Exceptions

œ. Scope Control and File Headers. File-level headers indicate whether files are authored by Neuroca or include third-party or mixed-origin content. If a file lacks a header, this License Package applies to Neuroca-authored files by default.

. Dependencies via Package Managers. Third-party dependencies installed via pip or other package managers remain under their own licenses and are not re-licensed by this License Package. Your use must comply with those licenses.

. Vendored Third-Party Code. If third-party code is ever vendored:

ÿ. Third-party files retain their original license headers and are placed under `third_party/<project>/` with original LICENSE/NOTICE preserved verbatim.

. For mixed-origin files, the original license governs the third-party portions, and Neuroca modifications are licensed under this dual license to the extent permitted by the upstream license.

j. Precedence and Compatibility. Licensor will respect upstream license prohibitions on adding further restrictions to derivatives. Aggregation or import of libraries does not change their licenses; copying or modifying code must honor upstream conditions.

ç. Notice Obligations. You must preserve required notices for licenses such as MPL-2.0 and Apache-2.0 when distributing modified files or binaries. See NOTICE.md at the Repository root for acknowledgments.

£. Required File Headers (templates)

☐. Neuroca-Authored Files. Include:

SPDX-License-Identifier: LicenseRef-Neuroca-PRL-2.1

Copyright © 2025 Justin K. Lietz, Neuroca, Inc.

Licensed under the Neuroca Proprietary Dual License (Academic + Commercial). See LICENSE.md for terms.

¥. Third-Party or Mixed-Origin Files. Preserve original license and notices intact. Add, where permitted, a note:

Neuroca modifications (if any) are © 2025 Justin K. Lietz, Neuroca, Inc. and are licensed under LicenseRef-Neuroca-PRL-2.1 to the extent permitted by the original license. See LICENSE.md and third_party/ files.

2. Contributions Policy (Summary: See CONTRIBUTING.md)

a. Inbound Licensing. By submitting a contribution, the contributor licenses the contribution under LicenseRef-Neuroca-PRL-2.1 and consents to Licensors re-licensing contributor contributions as necessary to offer commercial licenses for the project.

b. DCO Requirement. Each contribution must include a Developer Certificate of Origin (DCO) sign-off using the "**Signed-off-by: Name <email>**" trailer in each commit message. See DCO 1.1 for details.

c. Contributor Patent License (limited). Subject to defensive termination below, each contributor grants to Licensors a perpetual, worldwide, non-exclusive, royalty-free, irrevocable (except as provided herein) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the contributor's contribution as incorporated into the project, solely to the extent of the contributor's patent claims necessarily infringed by the contributor's contribution. If the contributor or its affiliate asserts a patent claim alleging that the project or Licensors' contributions infringe any patent, this patent license terminates as of the date such claim is filed.

d. Alternative Option. At Licensors' discretion, Licensors may implement a lightweight Contributor License Agreement in lieu of relying solely on DCO, limited to contribution licensing and re-licensing rights consistent with this License Package.

e. Outputs

f. Academic/Personal. Outputs generated solely under Academic Use or Personal Use may be used and shared non-commercially with required attribution. Outputs may not be monetized, licensed for a fee, or used to provide fee-based services under the Academic License.

g. Commercial. A commercial license may include express rights to monetize Outputs or models; such rights are defined only in a separate executed commercial license.

h. Enforcement

i. Academic/Personal Violations. Violations include: using Academic terms for Commercial Use; failing to provide required attribution; using the Materials in prohibited ethical domains.

j. Commercial Violations. Violations include: unlicensed Commercial Use; unauthorized sublicensing or redistribution; concealment or misrepresentation of proprietary methods or derivatives derived from the Materials.

k. Remedies. Upon any breach, all rights granted under this License Package terminate immediately. Licensors reserves all rights and remedies available at law or in equity, including claims for copyright infringement, trade secret misappropriation, and patent infringement, as applicable.

l. Operational Notice and Cure (non-binding guideline). Licensors may, but is not obligated to, provide a written notice identifying the violation and a short cure period or takedown request. Failure to timely cure may result in escalation to legal action or formal enforcement.

10. Warranty, Liability, Termination

m. Disclaimer. THE MATERIALS ARE PROVIDED "AS IS" AND "AS AVAILABLE" WITHOUT WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. YOUR USE IS AT YOUR SOLE RISK.

n. Limitation of Liability. TO THE MAXIMUM EXTENT PERMITTED BY LAW, LICENSOR SHALL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, EXEMPLARY, OR PUNITIVE DAMAGES, OR ANY LOSS OF PROFITS, REVENUE, DATA, OR GOODWILL, ARISING OUT OF OR RELATING TO THIS LICENSE PACKAGE OR THE USE OF THE MATERIALS, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT SHALL LICENSOR'S AGGREGATE LIABILITY EXCEED ONE HUNDRED U.S. DOLLARS (US\$100).

o. Termination. This License Package and all rights granted herein terminate automatically upon your breach. Sections relating to attribution, proprietary rights, patents, third-party licenses, warranty disclaimers, limitations of liability, enforcement, and this termination clause survive termination.

11. Miscellaneous

p. Governing Law and Venue. [Insert governing law and exclusive venue/jurisdiction, if desired; otherwise this clause is omitted.]

q. Export Controls. You represent and warrant that you will comply with all applicable export control and sanctions laws and regulations and will not export or re-export the Materials in violation thereof.

r. Trademarks. No rights are granted to use Licensor's names, logos, or marks, including "Neuroca," "Prometheus_VDM," "VDM," or "Void Nexus," except for factual references without any implication of sponsorship or endorsement. See TRADEMARKS.md if provided.

s. Entire Agreement. This License Package constitutes the entire agreement between you and Licensor concerning the Materials under the Academic License. Commercial licensing is governed exclusively by a separate, signed agreement.

t. Severability. If any provision of this License Package is held invalid or unenforceable, the remaining provisions remain in full force and effect.

u. No Waiver. No failure or delay by Licensor in exercising any right shall operate as a waiver thereof.

v. Updates. Licensor may publish updated versions of this License Package from time to time. Updated versions do not retroactively alter rights previously granted unless you affirmatively agree to the new version.

12. How to Request a License or Clarification

w. Commercial. Complete `COMMERCIAL_LICENSE_REQUEST.md` and email justin@neuroca.ai with subject line "**Commercial License Request – VDM / Neuroca.**"

x. Academic/Personal Clarifications. For gray areas or written confirmation of non-commercial uses, complete `ACADEMIC_LICENSE_REQUEST.md` and email justin@neuroca.ai with subject line "**Academic/Personal Clarification – VDM / Neuroca.**"

3. Notice.md – Third-Party Acknowledgments

a. Purpose and Positioning. This project uses third-party components installed via pip or other package managers. Each such component remains under its own license; this License Package does not re-license those components. As of the Last Updated date above, no third-party code is vendored into the Repository. If vendoring occurs in the future, original LICENSE and NOTICE files will be included under `third_party/<project>/` and listed here.

b. Project Header. Prometheus_VDM (VDM). Copyright © 2025 Justin K. Lietz, Neuroca, Inc.

c. Statement. Dependencies obtained via package managers are not relicensed by this project; their original terms govern. Consult the upstream projects for exact license texts and notices.

d. Dependency List (verify at release time):

- numpy — BSD-3-Clause — <https://github.com/numpy/numpy>
- scipy — BSD-3-Clause — <https://github.com/scipy/scipy>
- matplotlib — BSD-compatible — <https://github.com/matplotlib/matplotlib>
- networkx — BSD-3-Clause — <https://github.com/networkx/networkx>
- tqdm — MPL-2.0 — <https://github.com/tqdm/tqdm>
- ripser (ripser.py) — MIT — <https://github.com/scikit-tda/ripser.py>
- persim — MIT — <https://github.com/scikit-tda/persim>
- imageio — BSD-2-Clause — <https://github.com/imageio/imageio>
- opencv-python — Apache-2.0 — <https://github.com/opencv/opencv-python>
- librosa — ISC — <https://github.com/librosa/librosa>
- h5py — BSD-3-Clause — <https://github.com/h5py/h5py>
- plotly — MIT — <https://github.com/plotly/plotly.py>
- dash — MIT — <https://github.com/plotly/dash>
- redis (redis-py) — MIT — <https://github.com/redis/redis-py>
- statsmodels — BSD-3-Clause — <https://github.com/statsmodels/statsmodels>
- pytest — MIT — <https://github.com/pytest-dev/pytest>
- PyPDF2 — BSD-3-Clause — <https://github.com/py-pdf/PyPDF2>

GPU-related (reference only; not bundled):

- PyTorch (ROCm builds) — BSD-3-Clause (with subcomponent notices) — <https://github.com/pytorch/pytorch>
- AMD ROCm runtimes — various AMD OSS licenses — <https://github.com/RadeonOpenCompute/ROCm>

e. Footnotes.

f. Use of MPL-2.0 and Apache-2.0 components by import may require preserving notices when distributing binaries or modified files.

g. Users should consult upstream package distributions for the exact license text and any additional obligations.

4. Third_party/Readme.md – Vendoring Rules

a. Purpose. This file documents the process to follow if third-party code is ever copied into the Repository.

b. Current Status. No third-party code is currently vendored. All dependencies are obtained via pip or other package managers.

c. Vendoring Process.

d. Place each third-party component under `third_party/<project_name>/`.

e. Include the original LICENSE and NOTICE files verbatim.

f. Keep original file headers intact; do not add Neuroca proprietary headers to third-party-only files.

g. For mixed-origin files, clearly annotate which portions are third-party and which are Neuroca modifications.

h. Update the root NOTICE.md to list vendored components and their licenses.

i. Respect upstream license terms, including copyleft, attribution, and notice obligations.

j. Contact. Email justin@neuroca.ai with questions before vendoring.

5. Contributing.md – Contributions and Licensing

a. Purpose and Scope. This file outlines how to contribute code, documentation, or examples, and ensures inbound licensing is compatible with the dual-license model and potential commercial re-licensing.

b. Code of Conduct. If adopted, see CODE_OF_CONDUCT.md (e.g., Contributor Covenant). Contributors are expected to follow the Code of Conduct.

c. How to Contribute.

d. Use GitHub Issues and Discussions for ideas, bug reports, and feature requests.

e. Submit Pull Requests from topic branches; reference related issues and describe changes clearly.

f. Follow repository coding, testing, and documentation guidelines.

g. Developer Certificate of Origin (DCO).

h. By contributing, you agree to the DCO 1.1.

i. Each commit must include a Signed-off-by line, for example: Signed-off-by: Jane Doe <jane@example.com>

j. See <https://developercertificate.org/> for DCO 1.1 text.

k. Contribution Licensing.

l. You license your contributions under LicenseRef-Neuroca-PRL-2.1.

m. You grant Licensor a perpetual, worldwide, non-exclusive, royalty-free, irrevocable license to relicense your contributions for the purpose of offering commercial licenses for the project, including creating and distributing combined works incorporating your contributions.

- n. You represent that you have the right to contribute and that contributions do not include third-party confidential information or IP that you are not authorized to provide.
- o. Contributor Patent License (narrow).
- p. Subject to defensive termination, you grant to Licensor a perpetual, worldwide, non-exclusive, royalty-free license under your patent claims necessarily infringed by your contribution, limited to the contribution as submitted and as incorporated into the project.
- q. If you or your affiliate asserts a patent claim alleging that the project or Licensor's contributions infringe any patent, this patent license terminates as of the date such claim is filed.
- r. Third-Party Code.
- s. Do not copy third-party code into the Repository without prior approval from Licensor.
- t. If approved, follow the third_party/ vendoring rules, preserve original licenses and notices, and update NOTICE.md.
- u. Attribution. Contributors may be credited in a CONTRIBUTORS file and via GitHub history.
